

JULY CARES MOVES

Project	Description
ANRQ	There had been a problem where an MA only review required FTF, if there was an open SC AG in the case. A fix has been made to ANRQ to allow Face to Face = N for a case with an open SC AG.
AGOE	A Fatal was occurring when workers completed an over ride of FS AGs, and the SMRF date wasn't being reset correctly. This has been fixed.
Review Dates	A fix was made for the instance when FS was closed > 30 days due to 077, and review dates were not being reset correctly when the case was in review mode. The initial fix was rolled back, but has since been replaced.
FFU	CARES has been updated to determine FFU size according to the Addis decision of 1999. (See Ops Memo 99-86)
Mainframe Security Enhancements	Changes were implemented to facilitate consortia and to support inter-county agreements. (See attached)

AUGUST CARES MOVES

Project	Description
AGEV	A question has been added to AGEV to indicate that the primary worker has chosen for EVF related alerts to be sent to the change center. This field is available optionally by change center counties only. Not all change center counties have selected to us this option.
EVF Exception processing	Changes have been made to the 'exception' logic for EVFs so fewer forms will exception off. (See Ops Memo 04-38)
